SUN & VEGS

CRAZY FOR COURGETTES

PRODUCTION

We are the largest single producer of courgettes in Spain.

We grow our courgettes in more than 280 hectares, both in open fields and greenhouses, in the provinces of Murcia and Almería.

Our produce is homogenous and high quality **throughout the 52 weeks of the year**.

With our project Zero Cucurbita **we can reduce the usage of phytosanitary products up to 25%**.

RESULTS

Homogenous and high quality courgettes, directly from the field.
